The creep and shrinkage study described in this report is part of this project. The high performance concrete studied was made from the same mix design used for the high strength prestressed beams. The results of the creep and shrinkage study will be used for the overall project in determining the prestress losses in the beams.

Creep and Shrinkage of High Performance Concrete

Relation between modulus of elasticity of concrete and strength depends on the age. Modulus increases more rapidly than strength. Modulus of elasticity (LWA) = 40-80% Modulus of elasticity (NWA)* * ... CIVL582 Creep & Shrinkage of Concrete 29 . CIVL582 Creep & Shrinkage of Concrete 30 . Fig. 11.

viceability, durability and long-time safety of concrete structures. Thus, there is an urgent need for a reliable method to predict creep and shrink-age, especially for slender prestressed concrete structure's. Recently, we have witnessed efforts to introduce creep and shrinkage into design recommendations^{1,2,3} and to develop more realistic ...

Creep and shrinkage behavior of high-strength concrete and minimum reinforcement ratio for bridge columns Halit Cenar Mertol, Sami Rizkalla, Paul Zia, and Amir Mirmiran The use of high-strength concrete (HSC) in bridges and buildings has become increasingly common. HSC increases the load-carrying capacity of the columns and allows for

Guide for Modeling and Calculating Shrinkage and Creep in Hardened Concrete Reported by ACI Committee 209 ACI 209.2R-08 This guide is intended for the prediction of shrinkage and creep in compression in hardened concrete. It may be assumed that predictions apply to concrete under tension and shear. It outlines the problems and
