Safer Choice is a voluntary program that works to advance the mission of EPA to protect human health and the environment by helping product manufacturers choose the safest chemical ingredients possible.

### **Safer Choice | US EPA**

Green chemistry, also called sustainable chemistry, is an area of chemistry and chemical engineering focused on the designing of products and processes that minimize the use and generation of hazardous substances. Whereas environmental chemistry focuses on the effects of polluting chemicals on nature, green chemistry focuses on the environmental impact of chemistry, including technological ...

Humans have 60-70 2OG-dependent oxygenases, of which some are important therapeutic targets. A  
priority in the development of oxygenase inhibitors is to identify scaffolds selective for a particular enzyme,  
made challenging by the highly conserved oxygenase active sites.
