Drug design, often referred to as rational drug design or simply rational design, is the inventive process of finding new medications based on the knowledge of a biological target. The drug is most commonly an organic small molecule that activates or inhibits the function of a biomolecule such as a protein, which in turn results in a therapeutic benefit to the patient.

The utilization of peptides as therapeutics has evolved over time and continues to evolve with changes in drug development and treatment paradigms ().Peptides isolated from natural sources, such as insulin and ACTH, provided life-saving medicines in the first half of the 20th century.

Therapeutic peptides: Historical perspectives, current

AMPs are generally considered as positively charged small peptides, comprising about 12 ~50 amino acids , , .The availability of the positively-charged amino acids, such as lysine and arginine, confers a general positive net charge to the AMPs.

In this work, the FEP–BAR method was used to obtain an alternative linear regression model with 20 known BACE1 inhibitors. Statistical results ($R = 0.88$ and $R^2 = 0.78$) proved that this model might be used as a predictive tool of new BACE1 inhibitors.The following figure shows the most active compound designed, which exhibit a $K_D = 10$ nM. Besides, only freely available software packages ...

A unified total synthesis of stemoamide-type alkaloids is reported. Our synthetic approach features the chemoselective convergent assembly of five-membered building blocks via stemoamide as the common precursor to tetracyclic natural products. The synthesis consists of two successive coupling reactions of the three five-membered building blocks.

Nanotechnology is rapidly growing by producing nanoproducts and nanoparticles (NPs) that can have novel and size-related physico-chemical properties differing significantly from larger matter []. The novel properties of NPs have been exploited in a wide range of potential applications in medicine, cosmetics, renewable energies, environmental remediation and biomedical devices [2-4].
