This new book reviews the state of art in polycrystalline piezoelectric ceramic materials, which covers the processing, properties, characterization, and applications of piezoelectric ceramic ...

## **Piezoelectric ceramic materials: Processing, properties**

PI Ceramic provides a wide selection of piezoelectric ceramic materials based on modified lead zirconate titanate (PZT) and barium titanate. The designations of "soft" and "hard" piezo ceramics refer to the mobility of the dipoles or domains and hence also to the polarization and depolarization behavior.

A piezoelectric is a material that develops a dielectric displacement (or polarization) in response to an applied stress and, conversely, develops a strain in response to an electric field (11).

## **PROCESSING AND CHARACTERIZATION OF PIEZOELECTRIC MATERIALS**

piezoelectric materials are more efficient and mostly ceramics. Due to their complex crystalline structure, the process with which they are made is very precise and has
