polarization and cp violation pdf

CP violation in the Standard Model is highly ad hoc in the sense that it was invented to explain the decay of K^0 and it arbitrarily assumes that there is no CP violation in the leptonic and the first generation quark vertices.

Production of Polarized τ Pairs and Tests of CP Violation

PDF | We present the first measurement of polarization and CP-violating asymmetries in a $B(s)(0) \rightarrow \tau^+ \tau^- \pi^0$ decay into two light vector mesons, $B(s)(0) \rightarrow \tau^+ \tau^- \rho^0$, and an improved determination of its branching ...

T Violating Muon Polarization in ... We study the T violating transverse muon polarization in the decay of $K^+ \rightarrow \mu^+ \hat{A}_{\mu} \hat{I}_{1/2} \hat{I}_{1/2}^3$ due to CP violation in theories beyond the standard model. We find that the polarization asymmetry could be large in some CP violation models and it may be detectable at the

CP violation at a linear collider with transverse polarization

We place constraints on these couplings that could arise from suitably defined CP-odd asymmetries, considering realistic polarization (either longitudinal or transverse) of 80% and 60% for the electron and positron beams, respectively, and with an integrated luminosity $\int dt L$ of 500 fb^{-1} at a centre of mass energy of $\sqrt{S} = 500 \text{ GeV}$.

Springer Theses Recognizing Outstanding Ph.D. Research

The rate asymmetry A_{CP} probes CP violation due to interference between tree and penguin amplitudes of the same parity, while the polarization asymmetry A_{\pm} probes CP violation due to interference between tree and penguin amplitudes of opposite parities.

Circular Polarization vs. Linear Polarization Executive Summary The objective of this white paper is to provide a high level analysis of circular and linear polarization, and to alleviate the confusion

Circular Polarization vs. Linear Polarization

CP-conserving interactions, the CP-even term $(s + s^*)N$ of the normal polarization only gets contribution through the combined effect of both an helicity- $\frac{1}{2}$, $\frac{1}{2}$ transition and the presence of absorptive parts, which are both suppressed in the standard model.
