Introduction to Materials Science, Chapter 15, Polymer Structures. University Tennessee, Dept. of Materials Science and Engineering 2. ¼ Polymer - a large molecule consisting of (at least five) repeated chemical units ('mers') joined together, like beads on a string.

Introduction to Materials Science, Chapter 15, Polymers

polymer, processing, product and performance. The first section covers general topics such as historical background, basic material properties, molecular structure of polymers and thermal properties of polymers. The second section ties processing and design by discussing the effects of processing on properties of the final polymer component.

Materials Science of Polymers for Engineers

Polymer mechanical properties can be specified with many of the same parameters that are used for metals such as modulus of elasticity, tensile/impact/fatigue strengths, etc. However, polymers are, in many respects, mechanically dissimilar to metals.

APPLICATIONS AND PROCESSING OF POLYMERS

are products of materials science and technology (MST). Briefly defined, materials science is the study of 'stuff'. Materials science is the study of solid matter, inorganic and organic. Figures 1.1, 1.2, 1.3, and 1.4 depict how these materials are classified.

Materials Science and Technology Teacher Handbook

Manufacturing: Materials and Processing. Materials as a field is most commonly represented by ceramics, metals, and polymers. While noted improvements have taken place in the area of ceramics and metals, it is the field of polymers that has experienced an explosion in progress.

of chemistry, chemical engineering, and material science, and also for teaching polymer science and technology in polymer science institutes, which concentrate entirely on the science and technologies of polymers. This sixth edition addresses the important subject of polymer science and technology, with emphasis on making it understandable to students.

Polymer is an interdisciplinary journal dedicated to publishing innovative and significant advances in Polymer Physics, Chemistry and Technology. We welcome submissions on polymer hybrids, nanocomposites, characterisation and self-assembly. Polymer also publishes work on the technological application of polymers in Energy and optoelectronics.

Polymer - Journal - Elsevier

The book is aimed specifically at graduate students and researchers engaged in the study of polymer science and engineering and generically at those studying mechanical engineering, chemical engineering, materials science, and engineering, as well as related industry professionals.
