Parkinsons 8 SYMPTOMS This chapter describes the most common symptoms of PD. Remember once again that, although there are typical symptoms of PD, these can vary greatly from individual to individual both in terms of their intensity and how they progress. Motor symptoms generally involve movement, while non-motor symptoms do not.

### **Positively Parkinson's: Symptoms and Diagnosis, Research**

Parkinson's Disease: Is a progressive nervous system disorder that affects movement. Symptoms start gradually, sometimes starting with a barely noticeable tremor in just one hand. Tremors are common, but the disorder also commonly causes stiffness or slowing of movement.

### **Parkinson.pdf - Parkinsons Disease Is a progressive**

Ann Andrews has worked as a television and theatre producer, researcher, teacher and crisis counsellor. She was diagnosed with Parkinson's in midlife. Positively Parkinson's is the book she would have liked to read at that critical time. Sadly Ann died in 2017, but her book continues to be much in demand.

Results: A diagnosis of probable Parkinson's disease was confirmed in 83% of patients with this diagnosis, including three (2%) in whom atypical features were found that were insufficient to discard a diagnosis of Parkinson's disease. Two additional patients (2%) were found to have possible Parkinson's disease.
