Functions and commands are all case sensitive in C Programming language. You can use letters, digits and underscore \_ character to make your variable names.

### **(PDF) Programming in C in 7 days! - ResearchGate**

Up to now, designing a program (or a procedure or a function) has meant designing an algorithm. The structure of the data on which the algorithm operates was part of the problem statement. However, when we create a program, we often need to design data structures to store data and intermediate results.
