Psychoanalysis is a type of therapy that aims to release pent-up or repressed emotions and memories to lead the client to catharsis, or healing (McLeod, 2014). In other words, the goal of psychoanalysis is to bring that which is at the unconscious or subconscious level up to consciousness.

Psychoanalysis: What is Freud's Psychoanalytic Theory

Psychoanalysis would be a lengthy process, involving many sessions with the psychoanalyst. Due to the nature of defense mechanisms and the inaccessibility of the deterministic forces operating in the unconscious, psychoanalysis in its classic form is a lengthy process often involving 2 to 5 sessions per week for several years.
