Connectors enable contact between wires, cables, printed circuit boards, and electronic components. At TE Connectivity (TE), we design and manufacture an expansive portfolio of connectors that are engineered to reliably transmit data, power, and signal in the harshest environments, under the most extreme use.

Types of Connectors | TE Connectivity

Board-to-Board Connectors Designing a system in which multiple MGT signals (3.125 Gbps to 10 Gbps) cross directly from board to board or run over a backplane need special connectors. The Teradyne's GBx connector is a high-density, optimized differential connector family delivering data rates greater than 5 Gbps (tested up to 12 Gbps) (Figure 1).

Selecting Connectors for Multi-Gigabit Transceiver Designs

A modular connector is an electrical connector that was originally designed for use in telephone wiring, but has since been used for many other purposes. Many applications that originally used a bulkier, more expensive connector have converted to modular connectors. Probably the best known applications of modular connectors are for telephone and Ethernet.
