Ombu Enterprises, LLC Equipment Utilization Metrics Page 3 of 4 . Cycle time is the time to produce one part.. Design cycle time is the equipment's designed production rate.. Actual cycle time is the equipment's actual production rate.. Design operating time is the time the equipment should have taken to produce the parts and is the difference between the loading time and the speed loss time.

The United States government classification system is established under Executive Order 13526, the latest in a long series of executive orders on the topic. Issued by President Barack Obama in 2009, Executive Order 13526 replaced earlier executive orders on the topic and modified the regulations codified to 32 C.F.R. 2001. It lays out the system of classification, declassification, and ...

The Journal of CO<sub>2</sub> Utilization offers a single, multi-disciplinary, scholarly platform for the exchange of novel research in the field of CO<sub>2</sub> re-use for scientists and engineers in chemicals, fuels and materials. The emphasis is on the dissemination of leading-edge research from basic science to the development of new processes, technologies and applications.

Design is the creation of a plan or convention for the construction of an object, system or measurable human interaction. Design has different connotations in different fields (see design disciplines below). In some cases, the direct construction of an object (as in pottery, engineering, management, coding, and graphic design) is also considered to use design thinking.
