In The Long Shadow of Temperament, Kagan and Nancy Snidman summarize the results of this unique inquiry into human temperaments, one of the best-known longitudinal studies in developmental psychology. These results reveal how deeply certain fundamental temperamental biases can be preserved over development.

event? Is it the way we experience that event? Is it the long-term changes in emotional and physical functioning that follow the event? I define trauma as an experience, or pattern of experiences, that impairs the proper functioning of the person's stress-response system, making it more reactive or sensitive.
