"A Mathematical Theory of Communication" is an article by mathematician Claude E. Shannon published in Bell System Technical Journal in 1948. It was renamed The Mathematical Theory of Communication in the book of the same name, a small but significant title change after realizing the generality of this work..

A Mathematical Theory of Communication - Bret Victor

Mathematical logic is a subfield of mathematics exploring the applications of formal logic to mathematics. It bears close connections to metamathematics, the foundations of mathematics, and theoretical computer science. The unifying themes in mathematical logic include the study of the expressive power of formal systems and the deductive power of formal proof systems.

Galois Theory is in traditional mathematical format. The major elements of the book are definitions, lemmas, theorems, and proofs. The book introduces the major topics of Galois Theory.

Under review as a conference paper at ICLR 2017 If P r(x) > P g(x), then xis a point with higher probability of coming from the data than being a generated sample. This is the core of the phenomenon commonly described as $\hat{a} \in \mathbb{R}$ mode dropping $\hat{a} \in \mathbb{R}$ when there are large regions with high values of P

Mathematical Tools for Physics

The Journal of Mathematical Analysis and Applications presents papers that treat mathematical analysis and its numerous applications. The journal emphasizes articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, and engineering, particularly those that stress analytical aspects and novel problems and their solutions.
